

ABSTRACT

Cosmetic composition comprising a particular ester, and
uses thereof

The invention relates to a composition
comprising a physiologically acceptable medium
containing a fatty phase comprising at least one ester
resulting from the reaction of a polyol with a
carboxylic acid of formula (I) below:

in which R_1 , R_2 and R_3 are radicals independently chosen
from optionally functionalized alkyl, aryl and aralkyl
radicals, and combinations thereof.

The invention also relates to the use of an
ester of formula (I) above in a cosmetic composition
with staying power properties, especially of the
colour, and/or gloss and/or comfort and/or migration
resistance properties.
